RENALDI WIDAKDO

Fullstack Developer

About Me

I'm an experienced full-stack engineer skilled in both frontend and backend development, as well as database management. Proficient in languages like JavaScript, Python, and Java, I excel in creating responsive user interfaces and scalable systems. I'm committed to high-quality development and stay updated with the latest tech trends, always ready for new challenges.

Education

Vocational High School
Bina Informatika VHS
Jakarta
2011-2013

Vocational High School
Widyagama
Malang
2013-2014

The curriculum of RPL (Rekayasa Perangkat Lunak / Software Engineering) in an Indonesian Vocational High School (SMK) typically includes the following subjects:
1. Introduction to computer science and programming concepts
2. Object-oriented programming using a programming language such as Java or Python
3. Database management and SQL
4. Web development using HTML, CSS, JavaScript, and a web framework such as Node.js or Ruby on Rails
5. Mobile app development using Android or iOS
6. Software development methodologies such as Agile and Scrum
7. Software testing and debugging
8. Project management and team collaboration
9. Entrepreneurship and digital marketing

In addition to these subjects, students may also learn about computer hardware, network security, and ethical considerations in technology. The curriculum is designed to provide students with hands-on experience and practical skills in software development.
